

# Mint Conversion Information

---

Since your financial institution completed a system conversion, Mint aggregation services may be interrupted. Mint.com data is stored on Intuit cloud servers. Data is updated with every change and cannot restore data to a previous point in time.

During this time, the Mint.com server will automatically make the system conversion for your activated accounts. Your accounts should reconcile showing your transaction history available. In the event that your accounts do not display current transactions, you may log back into Mint.com and click refresh to update the account. After the download completes, click the Transaction tab to view up to 90 days of transaction history.
